

Sprouts: All About Growing

Facilitated Field Trip Experience for Kindergarteners

Facilitated Field Trip Highlights

- 90 min. outdoor program includes 3 hands-on learning stations.
- Revamped grade-specific STEAM curriculum.
- Experiential learning in a living museum led by an IBG facilitator.

Sprouts Field Trip Experience

- Students will learn about science concepts and then participate in hands-on activities that relate to Idaho Content Standards K-LS-1.1 and K-ESS-2.1.

Station 1:

- Students will search the Garden for native plants and animals and discover what they need to survive.

Station 2:

- Students will explore the differences in what plants and animals need to survive through a game.

Station 3:

- Students will learn that plants have different needs depending on where they are and visit a unique part of the Garden.

Idaho Content Standard

K-LS-1.1 Use observations to describe how plants and animals are alike and different in terms of how they live and grow.

K-ESS-2.1 Use a model to represent the relationship between the needs of different plants and animals and the places they live.
